Plans 4 Planning can create the full package of drawings that would be required on any development project.

- **Plans 4** Concept design
 - We produce fully 3D rendered images to show the client the finish product before it is started.
- **Plans 4** Planning
 - We produce the range of 2D plans required for a planning application including sections, elevations and land surveys.
- **Plans 4** Construction
 - We produce detailed drawings required for building regulations and construction.

We use software called Revit which is a 3D package that allows us to create and explore internal and external aspects of a development.

Take a look at our portfolio of our recent projects.

Many Thanks

David Hewitt

Examples of 2D & 3D Concept plans

This architectural drawing set for a Loft Conversion includes five 3D cutaway views labeled 'Option 1 - 2D Floor' through 'Option 5 - 2D Floor 2'. It also features 2D floor plans for 'Option 3 - Proposed Front Plan' and 'Option 3 - Proposed Loft'. Two 3D perspective views are shown on the right, and two 2D perspective views are on the left. A central section shows a cross-section of the building structure.

Loft Conversion

Plans 4 Planning

This architectural drawing set for a School refurbishment project features two 3D interior renderings showing a library and a meeting area. The central drawing is a detailed floor plan with a red curved path, labeled '1 Proposed 1:100' and '2 Existing 1:100'. A title block at the bottom identifies the project as 'The Hexcote Barn School Library and ICT Suite' with reference number 'E101'.

School refurbishment

Plans 4 Planning

This architectural drawing set for a Garage Conversion project includes two 3D front elevation renderings labeled '1 Existing Front View' and '2 Proposed Front View'. The central drawing shows the 'Proposed Floor Plans' and 'Existing Floor Plans'. A title block at the bottom identifies the project as '3 Larder Gardens' with reference number 'P100'.
